Participación en Proyectos de investigación

1. Construcción de gemelos digitales formales para la reconfiguración automática de sistemas complejos. PID2022-142181OB-I00, IP: María del Mar Gallardo, Laura Panizo. Ministerio de Ciencia e Innovación. 94.625,00 €.
2. 5G+TACTILE. 5G+TACTILE_1: Network Technologies and new protocols for deterministic over B5G/6G, MINECO-Spanish Government, TSI-063000-2021-11, 36 months, 2022-2024, 920.000€ Co-scientific director

3. DAD-IOT: Construction, Analysis and Deployment of IoT Applications. National project TIN2015-67083-R. IP: Ernesto Pimentel, María del Mar Gallardo. Ministerio de Economía y Competitividad, 77.924 €.
4. Check-it: New extensions of Formal Techniques for the modelling, verification, synthesis and optimization of embedded systems and mobile communications: Application to LTE protocol certification. Regional Project: P11-TIC-07659, 2013-2015, IP María del Mar Gallardo, 144.928 €.
5. 6G-SANDBOX. Supporting Architectural and technological Network evolutions through an intelligent, secureD and twinning enaBled Open eXperimentation facility, European Comission Grant agreement ID: 101096328, 36 months, 2023-2025, 2.324.000 € Leader of activities in formal methods
6. RFOG. Improving latency and reliability for FOG computing for critical applications, MICINN-Spanish Government, RTI2018-099777-B-I00, 36 months, 2019-2022, 179.000€ , Formal modelling and verification of protocols
7. Affordable 5G, High-tech and affordable 5G network roll-out to every corner, European Commission H2020-ICT-42-2020: 5G PPP – 5G core technologies innovation, Grant Agreement 957317, 24 months, 2020-2022, Atos (Spain), 6,8 M€, (342.000€ UMA). Definition of Automata Learning methods for TSN over 5G
8. EVOLVED 5G, Experimentation and Validation Openness for Long-term evolution of VERTical inDustries in 5G era and beyond, ICT-41-2020 - 5G PPP – 5G innovations for verticals with third party services, 36 months, 2020-2023, Telefonica (Spain), 8M€, 323.000€ UMA). Definition of Automata Learning methods for TSN over 5G
9. 5Genesis. 5th Generation End-to-end Network, Experimentation, System Integration, and Showcasing, European Comission, H2020-ICT-17 5G End to End Facility, Grant Agreement 815178, 42 months, 2018-2021, Demokritos (Grece), 15,8M€, (891.000€ UMA). Formal model and verification of critical components in the project
10. TRIANGLE. 5G applications and devices benchmarking, European Commission. H2020-ICT-12-2015 - Integrating experiments and facilities in FIRE+, Grant Agreement 688712, 36 months, 2016-2018, Keysight Technologies (Belgium), 2,9M€, (608.000€ UMA). Formal model and verification of mobile apps.

Contratos y transferencia,

1. SIGO: Innovative solutions for pre-5G communications, Keysight Technologies (fomerly Agilent Technologies), 30 months, 2015-2018, 280.000 €. Task developed: Design of testing methods for Keysight TAP tool.
2. 4Green, Wireless Devices Global Testing and Certification Management System, Keysight Technologies 36 months, 2012- 2014, 357.000€, Task developed: Application of formal methods for 4G applications
3. Development of Technologies and Tools to facilitate the deployment of the new 4G communications networks, AT4 wireless, 48 months, 2009-2012, Pedro Merino Gómez, 1.083.677 €, Task developed: Formal methods for 4G applications
4. Development of a Decision Support System for Dam management, BEFESA-ABENGOA Water-CENIT TECOAGUA, 36 months, 2009-2012, 205.000 €, Task developed: Design of formal models to support automatic decision.

ACTIVIDAD DOCENTE:

A lo largo de los más de 30 años de actividad docente, María del Mar Gallardo ha impartido gran cantidad de asignaturas de grado y posgrado dentro del área Lenguajes y Sistemas Informáticos. Por ejemplo, respecto a las asignaturas de grado ha impartido, entre otras, "Fundamentos de Programación", "Programación Paralela", "Programación Concurrente", "Análisis y diseño de algoritmos", "Programación de sistemas y Concurrency", "Programación Orientada a Objetos", "Métodos Formales para la Ingeniería del Software" tanto en la ETSI Informática como en la ETSI de Telecomunicación de la Universidad de Málaga. Además, en casi todas ellas, ha sido

coordinadora de la asignatura. Respecto a las asignaturas de posgrado ha impartido la asignatura "Métodos para la construcción de software fiable" el Máster de Ingeniería e Inteligencia Artificial, y "Técnicas Avanzadas de Desarrollo Software" en el Máster de Telemática y Redes de Comunicación, ambos de la Universidad de Málaga.

María del Mar Gallardo ha dirigido más de 100 PFCs, TFGs y TFM en los dos centros en los que ha impartido docencia. Asimismo, ha participado en varios Proyectos de Innovación docente con los compañeros de asignatura.

Ha dirigido cuatro tesis doctorales. Además, hay una quinta que se va a leer en durante 2024, y otra que está empezando a realizarse.

ACTIVIDADES DE LIDERAZGO (PARA CU):

Como méritos de liderazgo María del Mar Gallardo co-dirige el grupo de investigación MORSE en el Instituto de Tecnologías e Ingeniería del Software de la UMA.

Ha sido y es investigadora principal en tres proyectos nacionales y uno regional:

1. Construcción de gemelos digitales formales para la reconfiguración automática de sistemas complejos. PID2022-142181OB-I00, PI: María del Mar Gallardo, Laura Panizo. Ministerio de Ciencia e Innovación. 94.625,00 €.
2. 5G+TACTILE. 5G+TACTILE_1: network Technologies and new protocols for deterministic over B5G/6G, MINECO-Spanish Government, TSI-063000-2021-11, 36 months, 2022-2024, 920.000€ Co-scientific director
3. DAD-IOT: Construction, Analysis and Deployment of IoT Applications. National project TIN2015-67083-R. PI: Ernesto Pimentel, María del Mar Gallardo. Ministerio de Economía y Competitividad, 77.924 €.
4. Check-it: New extensions of Formal Techniques of for the modelling, verification, synthesis and optimization of embedded systems and mobile communications: Application to LTE protocol certification. Regional Project: P11-TIC-07659, 2013-2015, María del Mar Gallardo, 144.928,00 €.

Ha participado en muchos contratos de investigación con empresas del Parque Tecnológico de Andalucía liderando las actividades relacionadas con el modelado y análisis formal de los sistemas:

1. SIGO: Innovative solutions for pre-5G communications, Keysight Technologies (fomerly Agilent Technologies), 30 months, 2015-2018, 280.000 €. Task developed: Design of testing methods for Keysight TAP tool.
2. 4Green, Wireless Devices Global Testing and Certification Management System, Keysight Technologies 36 months, 2012- 2014, 357.000€, Task developed: Application of formal methods for 4G applications
3. Development of Technologies and Tools to facilitate the deployment of the new 4G communications networks, AT4 wireless, 48 months, 2009-2012, Pedro Merino Gómez, 1.083.677 €, Task developed: Formal methods for 4G applications
4. Development of a Decision Support System for Dam management, BEFESA-ABENGOA Water-CENIT TECOAGUA, 36 months, 2009-2012, 205.000 €, Task developed: Design of formal models to support automatic decision.
5. Communication software for mobile networks 3.9G y 4G, AT4 wireless, 10 months, 2008,122.153 €, Task developed: Modelling and verification with SDL.
6. Research in methodologies for reliable software in communication systems beyond 3G, Cetecom, 24 months, 2006-2008, 290.000 €. Task developed: Modelling and verification with SDL.

Ha liderado las tareas relacionadas con métodos formales de varios proyectos europeos:

1. Affordable 5G, High-tech and affordable 5G network roll-out to every corner, European Commission H2020-ICT-42-2020: 5G PPP – 5G core technologies innovation, Grant Agreement 957317, 24 months, 2020-2022, Atos (Spain), 6,8 M€, (342.000€ UMA). Definition of Automata Learning methods for TSN over 5G
2. EVOLVED 5G, Experimentation and Validation Openness for Long-term evolution of VErtical inDustries in 5G era and beyond, ICT-41-2020 - 5G PPP – 5G innovations for verticals with third party services, 36 months, 2020-2023, Telefonica (Spain), 8M€, 323.000€ UMA). Definition of Automata Learning methods for TSN over 5G
3. 5Genesis. 5th Generation End-to-end Network, Experimentation, System Integration, and Showcasing, European Comission, H2020-ICT-17 5G End to End Facility, Grant Agreement 815178, 42 months, 2018-2021, Demokritos (Grece), 15,8M€, (891.000€ UMA). Formal model and verification of critical components in the project
4. TRIANGLE. 5G applications and devices benchmarking, European Commission. H2020-ICT-12-2015 - Integrating experiments and facilities in FIRE+, Grant Agreement 688712, 36 months, 2016-2018, Keysight Technologies (Belgium), 2,9M€, (608.000€ UMA). Formal model and verification of mobile apps.
5. Federation for FIRE (Fed4FIRE), Comisión Europea, FP7- ICT, Grant Agreement Number 318389, 36 meses, 2013-2016, Pedro Merino Gómez, Piet Demeester, iMinds (Bélgica), 11.067.773 Euros
6. Smart Water Management With Integrated DSS (SAID), Comisión Europea, ENV-2013-WATER-INNO-DEMO-1, Grant Agreement Number 619132, 36 meses, 2014-2016, Pedro Merino Gómez, Antonio Linares, Abeinsa BD (España), 3,2 millones de euros

Ha pertenecido y pertenece a varios comités de programa de congresos nacionales e internaciones: FMICS, SPIN, PROLE, ACM SAC, SAS

OTROS MÉRITOS:

María del Mar Gallardo está muy involucrada en los problemas de género en las áreas STEAM. Ha participado en varias mesas redondas y dado conferencias en las que se trataba del problema de la falta de mujeres en las áreas STEAM. En la actualidad forma parte del grupo de profesoras de la Universidad de Málaga responsable del proyecto "comotu" en el que participan alrededor de 120 profesoras y profesionales de la ciencias e ingeniería. El objetivo de este proyecto es visibilizar el papel de la mujer en estas áreas dando charlas y talleres en colegios a niños de todas las edades, preferentemente en primaria.

En cuanto a actividades de gestión, María del Mar Gallardo ha sido subdirectora y secretaria de la ETSI de Telecomunicación de la UMA durante 10 años. También fue secretaria del departamento de Lenguajes y Sistemas Informáticos durante dos años.
